**System size:** 1.7 MW DC / 1.5 MW AC

**Annual power production:** 2,617,666 kWh per year

**7,629 solar modules**

**Utility offset:** 101%

**Renewable Energy Credits:** 2,618 per year

**Cumulative energy savings over 25 years:** $13,675,754

**Greenhouse Gas Equivalencies:** 1,880 Metric Ton of CO2 saved

**Carbon sequestered annually:** 401 acres of pine forest

**Land area of solar panel system:** 7.5 acres

**Cumulative Energy Savings:**

- **$13,675,754**
- **1,880 Metric Ton of CO2 saved**
- **401 acres of pine forest**

Your favorite pistachios just got GREENER

As an American agricultural business, and as a family owned company, Setton believes in not just planning for the future, but working toward a better one. By exploring new technologies, supporting family farms and encouraging environmentally friendly production methods, Setton is striving to support the next generation while producing superior pistachio products.

Setton’s new solar power system will produce over 2.6 million kilowatt hours of clean energy per year to sort, roast and package millions of pounds of pistachios each year in Setton’s 300,000 square foot processing facility.

The emissions savings of Setton’s solar power system is equal to planting 400 acres of pine forest annually.

Located in the heart of the San Joaquin valley in California’s central valley, Setton Pistachio of Terra Bella, Inc. is one of America’s largest pistachio growers and processors. The family’s passion for farming California pistachios began in 1989 and today Setton farms over 7,000 acres owned and in partnership with others.

Our impressive 50 acre processing and storage facility spans 300,000 square feet, incorporating the latest technologies in each stage of production. Our ability to focus on every step of the process ensures the top quality and value of our products for consumers. Setton attends to each detail of growing, harvesting, processing, manufacturing and packaging pistachios.
