Setton Pistachio of Terra Bella, Inc., located in the heart of California’s San Joaquin valley is America’s second largest pistachio grower and processor. As a vertically integrated pistachio company, we are able to focus on every step of the process, ensuring top quality for our customers. For over 30 years Setton Pistachio has been producing America’s Best Tasting Pistachios™, continuing that same superior quality and product innovation today. From growing to processing to marketing, our tradition of excellence makes us your preferred California pistachio supplier.
Harvesting
During harvest, Setton’s facilities operate 24 hours a day, 7 days a week and are capable of processing over 350 loads of pistachios per day. Our central California locations and private fleet of trailers ensures the fastest turnaround times possible. With over 425 trailers, and further expansion planned each year, Setton Pistachio ensures first-rate service for our growers now and in the future.

Processing
All pistachios are not the same. When placed in one of Setton’s trailers, pistachios are tracked through GPS and RFID monitoring so we know where they are at all times. Once at the plant they are sampled, hulled and dried through a continuous monitoring process to our silos. Our quality measures are maintained from our ranches and our grower’s ranches to the final consumer. Our company’s proprietary drying process insures they will become America’s Best Tasting Pistachios™.
